RE: COVID-19

All,

With our nation being affected by the COVID-19 virus many in our industry have questions. As it relates to NAPCO Bag and Film I can give you a snap shot of the positives. Our raw material is plentiful, our inventory robust and our labor is healthy.

All of our raw material is domestic and comes from either unaffected areas or lightly affected areas.

All of our inventory was produced right here in either Carrollton, Texas or Waverly, Iowa. We do not import anything.

Our labor is aware of how this virus is transmitted and are taking the appropriate steps to avoid being exposed to it.

We all at NAPCO Bag and Film hope for this event to be over soon and that this great nation can get back to business as usual. Feel free to reach out to any NAPCO Bag and Film manager if you would like to talk further about this subject and how we might be of assistance.

Regards,

Steven S. Rife
Executive Vice President
