

Additional safety for visitors, employees and volunteers, especially while there is a shortage of sanitizer and disinfectant.

Application

- One volunteer/employee on each side of the seats, holding one side of the roll, can apply the seat cover to an entire row in seconds.

Disposal Options

- The plastic can be removed and taken to a recycling center, or disposed of with other waste.

Additional Benefits

- Protects seats and visitors' clothes. Sanitizer and disinfectant can potentially stain seats, remain wet for a period of time, cause slip hazards, and stain clothes.
